

**Dear Sir/Madam,**

*As the owner of r2eko Artur Owczarek, a company specializing in environmental protection, I would like to introduce myself and my company, believing that I can offer you and your employees substantive support in the challenging field of environmental protection. Support at the highest, global level.*

*For over 15 years, I worked in the Regional Environmental Protection Inspectorate Inspection Department in Łódź, where I started my career as an Inspector and ended as the Director. When I left the Regional Environmental Protection Inspectorate in Łódź, I conducted over a thousand inspections of economic entities, accumulating valuable professional experiences.*

*At the same time, as an environmental auditor specializing in greenhouse gas emissions, I have had the opportunity to audit the largest installations in Poland, with total audits exceeding a thousand. The professional experience gained in both the public administration and the private sector as a GHG auditor led me to establish my own business providing environmental outsourcing services at the highest possible level - concerning environmental regulations from both the entrepreneur's and the official's perspective.*

*Currently, I carefully select employees, aiming to ensure that their knowledge and professional experience guarantee the high quality of services provided by r2eko Artur Owczarek. We have individuals in our team with administrative, corporate, engineering, and project experience. Our ranks are also supplemented by people from outside Poland, who contribute valuable input to our company's portfolio.*

*When working with clients, we always strive to get to the heart of the problem to solve it quickly and effectively, and above all, in compliance with the applicable laws and regulations. Our true satisfaction comes from a satisfied client.*

*As a company, we can offer you a full range of environmental services, from environmental outsourcing and environmental audits to substantive support, preparation of all possible environmental documentation, and closed training sessions.*

*Since February 1, 2023, we have had the pleasure of providing environmental outsourcing services to your company's branch in Łódź ("JOGO" Łódzka Spółdzielnia Mleczarska in Łódź at Omłotowa 12), which includes:*

- Free initial audit identifying any non-compliance with environmental regulations throughout the company, including all its branches and facilities.*
- Environmental compliance audits are carried out in all branches and facilities of the company every 6 months.*
- Identification of legal requirements related to environmental regulations applicable to the Client on an ongoing basis.*
- Taking necessary actions to adapt the operation of all the Client's branches and facilities to environmental requirements within 14 days of identifying any irregularities.*
- Periodic calculation of fees for environmental use and preparation of reports required by environmental regulations annually, no later than March 31 of the following fiscal year.*

- Maintenance of required reporting records, including waste records in the BDO database on an ongoing basis.
- Responding to summonses from administrative authorities (Regional Environmental Protection Inspectorate, City Office, Regional Office) and any summonses from the Client by the deadlines specified by the authorities.
- Representing the Client during inspections and administrative proceedings conducted by administrative authorities (Regional Environmental Protection Inspectorate, District Office, City Office, Municipal Office, Regional Office) on an ongoing basis during inspections.
- Supervising waste contracts with external companies and verifying the legality of their operations every quarter by the end of each quarter.
- Continuous monitoring and implementation of new environmental regulations on an ongoing basis.
- Despite the ownership changes that have taken place in the "JOGO" Dairy Cooperative, I would like our cooperation to continue.

In the attachment to this cover letter, you will find an offer for the new scope of environmental services provided in your company's branch in Łódź - **offer no. 1**.

Additionally, I have included sample offers representing the full spectrum of our services, which you may find of interest:

**Offer no. 2** - Environmental audits covering all environmental components and obligations. Audits can be conducted at present or can be extended to cover a specified period in the past, following the principles of inspections conducted by the Regional Environmental Protection Inspectorates. Audits and audit reports can be conducted and prepared in Polish, English, French, and/or Arabic.

**Offer no. 3** - Environmental consultancy provided via email and telephone during business hours from 8:00 AM to 4:00 PM.

**Offer no. 4** - Closed environmental training sessions tailored to your staff's specific environmental requirements. Training sessions can be conducted in Polish, English, French, or Arabic. Training can be held at your company, in our conference room in Łódź, or at any specified location in Poland or worldwide.

**Offer no. 5** - Environmental consultancy in the area of sustainable ESG development and corporate and product carbon footprint. Consultancy can be provided in Polish, English, French, or Arabic.

Attached to this cover letter is our company portfolio with selected environmental topics. If you are interested in any of our services, I invite you to contact us by phone or email. I would be pleased to meet with you to discuss the possibilities and options for cooperation in detail.

Yours sincerely,

Artur Owczarek
